

Randy and Kathy

We have used the parenting principles taught by the Ezzos in the GFI curricula in our family for almost 18 years and we can testify that we are now bearing the fruit and enjoying our children's friendship. In addition we have disciplined many other couples using the material and again can testify to God using it to change lives, over and over again. We thank God many times for introducing us to the Ezzos and the teaching God provided through them. Even if some of the allegations were true we would still use the material because it is biblical and it works. However we can also testify that any investigation on our part into the allegations has proven them to be totally false. We simply don't understand why anyone would want to undermine something that God has used to help so many families.
